A farmer usually prepares his fields for planting fruits and vegetables in early spring. He makes the soil rich for plants. Later, when the days grow longer and the sun warms the earth, he plants the seeds. After planting, he watches the weather, always hopes for enough rain and sun. He waters the young plants and watches for the signs of plant diseases. He knows some insects bring diseases and some others eat the food that he grows. Still there are insects, like bees and butterflies that help flowers and fruits to grow.
